WORK EXPERIENCE

Flutter Developer

Wybrid · Full-Time

Aug 2025 – Present

- Developing and maintaining the Wybrid platform — a real estate digitalization product enabling businesses to rent office spaces, meeting rooms, and pantry facilities.
- Architecting Flutter apps using Provider state management for scalable, maintainable codebases.
- Integrating REST APIs for seamless communication between mobile client and backend services.
- Implementing real-time features using WebSockets for live availability and booking updates.
- Collaborating in agile sprints and contributing to product roadmap decisions.

Flutter Developer Intern

Wybrid · Internship (4 months)

Apr 2025 – Jul 2025

- Contributed to core Flutter development of the Wybrid real estate platform.
- Worked with Provider state management and REST API integrations from day one.
- Demonstrated strong performance leading to a full-time offer within 4 months.

Flutter Developer Intern

Talent Connect: Campus to Cubicle · Internship (4 months)

Jan 2025 – Apr 2025

- Built Synzy — a full-fledged school & college discovery app, end-to-end from backend to mobile.
- Developed Flutter/Dart mobile app with Provider state management and REST API integration.
- Implemented AI-based college recommendation system tailored to student preferences.
- Built and deployed a Node.js backend server on Hostinger VPS with Firebase for data services.
- Features included college search, student applications, tracking, and preference-based filtering.

TECHNICAL SKILLS

Primary Stack	Flutter · Dart · Provider State Management
APIs & Real-Time	REST APIs · WebSockets
Databases	Firebase (Advanced) · SQLite · MongoDB (Intermediate)
Tools & Platforms	Android Studio · VS Code · Git & GitHub · Postman

PROJECTS

Synzy — College Discovery App

Flutter · Dart · Provider · REST APIs · Node.js · Firebase · AI Recommendations

Jan 2025 – Apr 2025

- Full-stack school & college discovery platform with AI-based recommendations built at Talent Connect.
- Students can search, apply, and track colleges based on their preferences.
- Node.js backend deployed on Hostinger VPS; Firebase for auth and real-time data.

Shrinkify — Image Compressor

Flutter · Dart · Provider

2025

- Fully local image compression app with no server dependency.
- Supports batch compression with customizable quality settings.

Hex Chatbot

Flutter · Dart · GetX · OpenAI API (GPT-4o Mini) · Firebase

Feb 2025

- AI-powered chatbot app with 50 free daily requests and optimized prompts.
- GetX state management; Firebase backend for user session handling.

HasicX — Music Player App

Flutter · Dart · GetX · SQLite

Jan 2025

- Feature-rich music player with playlist creation, looping, and favourites.
- Background playback with notification controls.
