SUMMARY

Flutter Developer with **1.5+ years** of experience building and shipping production mobile applications. Built and shipped features for enterprise-grade Flutter apps at Wybrid Technology, delivering features used by real customers and business partners. Published **6 apps** on the Google Play Store and created **flutter_feature_cli**, an open-source Dart CLI tool for automated Flutter feature structure generation, with 150+ downloads on **pub.dev**. Focused on Clean Architecture, scalable state management, and writing maintainable, testable code.

PROFESSIONAL EXPERIENCE

Wybrid Technology Pvt. Ltd.

Flutter Developer

Apr 2025 – Present

Mumbai, Maharashtra

- Collaborated with a team of 3 developers to revamp Wybrid's production Flutter applications, adopting a **feature-first architecture** and modernizing key modules including Events, Tickets, Wallet, Phone Booth, and Authentication.
- Built the **Canteen & Pantry Management** feature from scratch — covering packaged-food menus, cart-based ordering, booking time constraints, order records, status updates, and feedback workflows — now actively used by **500+ users**.
- Built **guest meeting and workspace booking** capabilities from scratch, integrating **50+ REST APIs** and managing application state with Provider across scalable, modular Flutter features.
- Improved codebase quality by migrating scattered setState calls to **Provider and ValueNotifier**, replacing ad-hoc navigation with **go_router**, introducing **dependency injection**, moving API calls out of the UI layer into dedicated service classes, and writing unit tests — significantly improving code readability and maintainability.

Talent Connect: Campus to Cubicle

Software Developer Intern

Jan 2025 – Apr 2025

Remote, India

- Led Flutter development for Referd — a referral-based job platform built from scratch — as the senior Flutter developer on a 2-person mobile team, delivering multi-role onboarding, referral postings, referral requests, application tracking, notifications, and in-app messaging.
- Designed and implemented a job discovery workflow enabling candidates to submit external job postings, match with relevant professionals on Referd, and request employee referrals — bridging job seekers with industry connections.
- Architected the Flutter codebase with **go_router, dependency injection, and Provider-based state management**, migrating setState-driven patterns into scalable, application-wide state management from the ground up.
- Collaborated with the backend team on API design — advising on response structure, data shaping (list vs. detail endpoints, MongoDB population strategy) — and managed production deployment to a **Linux VPS** with **CI/CD pipelines** and web deployment support.

SKILLS

- Programming Languages:** Dart | Java | JavaScript
- Frameworks & Development:** Flutter | Node.js | Express.js | Android
- Architecture & State Management:** Clean Architecture | Provider | ValueNotifier | BLoC
- Backend & Databases:** REST APIs | Firebase | MongoDB | SQLite
- Cloud & DevOps:** AWS EC2 | Docker | CI/CD | Linux VPS

PROJECTS

flutter_feature_cli

- Built and published an open-source Dart CLI tool that automates Flutter feature scaffolding — supporting Clean Architecture, Partial Clean Architecture, MVC, MVVM, and **custom user-defined templates** — allowing developers to generate consistent folder structures and barrel files in seconds.  **150+ downloads on pub.dev** 
- Technologies Used:** Flutter, Dart

Hex : Your Personal AI

- Developed a GPT-4o Mini powered Flutter chatbot with Firebase backend and GetX state management, implementing optimized prompts and a **50 free requests/day** usage model for a fast, cost-efficient conversational experience. **100+ downloads on Google Play Store.** 
- Technologies Used:** OpenAI API, GetX, Flutter, Dart, Firebase

HasicX : Music Player App

- Built a dynamic music player with playlist creation, song looping, and favorites management — backed by **SQLite** for persistent local storage — with background playback and notification controls for a seamless listening experience. **50+ downloads on Google Play Store.** 
- Technologies Used:** Flutter, Dart, SQLite, Relational Database

EDUCATION

Diploma in Computer Engineering — Government Polytechnic, Mumbai | 87.17%

2022 – 2025

SSC — Sacred Heart Boys High School | 83.40%

2021 – 2022
